

WETHERBY ORTHODONTICS

# BOOK A VIRTUAL CONSULTATION

1

## Decide on a virtual consultation

These appointments will take 30 minutes and are aimed at new clients considering orthodontic treatment at Wetherby Orthodontics. You should live or work within reasonable distance of Wetherby. Please book in advance.

2

## Request an appointment

[mail@wetherbyortho.co.uk](mailto:mail@wetherbyortho.co.uk)

Please email us to request an appointment, stating your availability. Check our social media for virtual clinic times, or state preference for morning, afternoon and two preferred weekdays

3

## Download the Zoom app

We'll be using Zoom video calling. You don't need an account and you may have already used Zoom. Just click the link at your appointment time. You may wish to have another household member with you. We will not be recording but will take paper notes to be added to our patient management system later.

4

## Get ready for your appointment

Find a quiet place with good light. Your phone or computer camera should be at face level and ideally hands-free (or have an assistant!). Two teaspoons are recommended to help us see your teeth (we'll demonstrate!).

5

## During your consultation

After introductions we will ask some details including address and medical history, as well as why you'd like treatment. You will be asked to show your whole face from the front and the side, as well as your smile and your teeth. We will discuss types of treatment that might suit you, including potential treatment time and costs

6

## After your consultation

We will send a summary of your consultation by email, including potential costs. This is subject to a full consultation once we reopen. After our existing patients have been seen we will prioritise those who have had virtual consultations in date order.
